

# **SANGEETA BRUMMITT**

GENOME MANAGER, MISSION MEASUREMENT

Sangeeta Brummitt is an experienced program manager, having worked with various leading national association and membership organizations. At Mission Measurement, Sangeeta oversees the Impact Genome Project (IGP)®, a public private partnership to create the most comprehensive evidence base of ‘what works’ in creating social change. Sangeeta manages engagements with leading national corporate and family foundations, nonprofit organizations and research institutions to measure and evaluate their impact. An initiative of the Impact Genome Project, the Olympic Sports Genome, is led by Sangeeta in partnership with the USOC to codify research literature and programmatic data on ‘what works’ to create podium potential athletes.

Sangeeta holds a M.A. from the University of Chicago in Social Service Administration and a B.A. in Psychology and Organizational Behavior from Washington University in St. Louis. Sangeeta is a D-III All-American in track and field.
